

Patients need access to their medical records in one location. ACOs/CINs struggle with this as each practice or hospital typically offers their own patient portal. As a result, patients face challenges accessing and utilizing their own health data.

HealthSYNC of Louisiana can solve this problem for your ACO/CIN by providing patients one personal health record with medical information from all participating members.

**CONNECT.**  
**ANALYZE.**  
**ENGAGE.**  
**TRANSFORM.**

Empower your patients by giving them an effective tool to better manage their own care. myLAHealthRecords is the simple, secure, ONC-certified personal health record connected to all of the physicians in your ACO, as well as physicians around the state and across the nation.

myLAHealthRecords.com:

- Gives patients access to their most complete patient record as data is integrated from HealthSYNC of Louisiana.
- Presents patients with the ability to update, organize, and access records using a computer, tablet, or smartphone.
- Provides up-to-date patient education that supports patients in making good decisions regarding their healthcare.
